

Connecting you to everyone and everything

About AMS-IX

AMS-IX is a neutral member-based association that operates multiple interconnection platforms around the world. Our leading platform in Amsterdam has been playing a crucial role at the core of the internet for more than 25 years and is one of the largest hubs for internet traffic in the world.

Connecting to AMS-IX ensures customers such as internet service providers, telecom companies and cloud providers that their global IP traffic is routed in an efficient, fast, secure, stable and cost-effective way. This allows them to offer low latency and engaging online experiences for end-users.

Our services

Internet Peering
Exchange internet traffic with a multitude of networks via one single connection.

IX-as-a-Service
Managed solution for running your own Internet Exchange.

Mobile Peering
Exchange your global roaming data securely with other mobile providers.

Anti-DDoS
Mitigate Distributed Denial of Service attacks via our interconnection platform.

Private Interconnect
Connect privately with one of your customers, suppliers or business partners.

Closed User Group
Connect privately with 2 or more organisations, outside the public internet.

EasyAccess
One-stop shop combining IP transport and peering service allowing you to connect remotely to our platform from 250+ locations in Europe.

Cloud Access
Enhance the quality of your Cloud connection by connecting to the networks of Microsoft, Google or Amazon directly.

Worldwide access

Our interconnection platforms are accessible from 500+ locations around the world.

You can either connect directly from one of the Data Centres where we have a presence, or remotely either via our EasyAccess service or via one of our trusted partners. To find your nearest location, visit our website.
